

Tree	 <p>Acer palmatum dissectum 'Seiryu (weeping standard)' SEIRYU WEEPING JAPANESE MAPLE</p>
Description	<p>This is a small grafted Seiryu weeper at 1.4m. As a standard, this tree offers the same beautifully delicate lacy leaves that turn gold to crimson in autumn as the normal tree form. As a weeper, it makes for an attractive selection for courtyards and small gardens where there is protection from full sun. Its light green new growth provides a striking contrast against older foliage.</p>
Foliage	<input checked="" type="checkbox"/> Deciduous
Form	<input checked="" type="radio"/> Standard
Mature Size	1.5m grafted
Uses	<p>Like the other Japanese Maples, this tree is suitable for smaller gardens and courtyards with protection from full sun. Works well as a feature tree or in group plantings.</p>
Position & Soil	<p>Prefers a moist, well drained soil. It should be placed in a protected area of the landscape to protect it from hot summer winds that may scorch the fine leaves. Requires a location that is protected from north or west sun, or hot wind in summer.</p>
